EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David Safran on 17 March 2005.

The application has been amended as follows:

In claim 17, line 16 delete the second period.

Replace the abstract with the following:

A microscope for transmission viewing of a specimen[, said microscope comprising] including a light source for producing a light beam; an objective lens positioned for focusing the light beam produced by said light source on an area of the specimen for illuminating said area; and a reflector [means] positioned for reflecting light transmitted through the specimen back through the illuminated area of the specimen.

Allowable Subject Matter

1. Claims 17-26 and 29-30 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Art Unit: 2872

Claim 17-26 and 29-30 are allowable over the prior art for at least the reason that the prior art fails to teach and/or suggest a microscope with “a reflector means positioned for reflecting light, which has been focused by the objective lens on the illuminated area and transmitted through the specimen, back through the illuminated area of the specimen,” “wherein said light source is adapted to allow for a change between different wavelengths for producing, alternately transmitted light illumination and epi-fluorescence illumination” and “wherein said dichroic beam splitter is essentially impermeable with respect to said excitation light and essentially, but not completely, permeable with respect to fluorescent light and light for said transmitted light illumination” together as set forth in the claimed combination.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Weimer et al., U.S. 4,515,447 discloses a fluorescent microscope with a single beam splitter.
